Subject: The motion to vary the timing of the establishment of the Boundaries of the Official Community Plan

Dear Council,

We strongly object to any attempts to delay or change any aspect of the Official Community Plan. A great deal of time, money and energy went into forming the plan. It was accepted by the council and the community and should be adhered to.

The growing population of the municipality is both a blessing and a curse. We have elected you all to handle this with wisdom and attention, keeping in mind the overwhelming concerns of climate change. How much water will be enough? How will we manage without fossil fuels? The whole growing population is your responsibility. Not any particular group, not any special for profit group but the whole population of the muni. We wish you all the fairness and wisdom you need to follow the OCP as adopted.

Sincerely, [REDACTED], Duncan, B.C.
